About Me

Computer Science student passionate about backend development and building reliable web applications. Experienced with Python, SQL, debugging, and API testing through academic and personal projects. Eager to learn industry practices and contribute as a backend developer intern.

Experience

Founding Member & Board of Programmer

Quezon City, Philippines

Junior Philippine Computer Society (JPCS) - Quezon City University Chapter

August 2024 - July 2026

Co-founded the university chapter and designed algorithmic competition questions, ensuring accurate evaluation of participant code logic and efficiency.

Department of Social Welfare and Development (DSWD)

Quezon City, Philippines

Farm Support Worker (Cash for Work Program)

April 2026 - July 2026

Assisted in agricultural operations, data recording, and logistics under the DSWD Cash-for-Work Program.

Projects

Barangay San Martin De Porres Portal | Web Development Case Study

- Developed an official digital portal for local governance, consolidating community announcements and emergency hotlines to improve public access.
- Built a digital service request module, **enabling** residents to process local clearances and business permits online to reduce manual queueing.
- Integrated a structured service guide with transparent fee and requirement tracking, streamlining administrative inquiries for both residents and officials.

IntelearnHub DTR & Payroll System | Quality Assurance & System Debugging

- Tested application functionalities and identified integration bugs, contributing to a more stable deployment environment for the web platform.
- Troubleshot routing errors and authentication issues within the kiosk interface, resolving infinite loading states to improve overall user access.
- Reviewed backend API endpoints and database workflows, **ensuring** the accurate synchronization of daily time records for payroll processing.

Technical Skills

Programming /Query Language: Python, SQL

Tools & Software: Microsoft Excel, Git, VS Code

Education

Quezon City University

Bachelor Of Science in Computer Science

S.Y 2023 - Present

Our Lady Of Fatima University

Senior High Graduate - Science, Technology, Engineering and Mathematics

S.Y 2021 - 2023

Certifications

Learn SQL in 3 Hours: A Tutorial for Fast Learners

December 2024

Udemy (OCSALY Academy)

Python for Data Science, AI & Development

November 2025

IBM | Coursera
